Himmerlands østkyst i vintervejr

Der kan være rigtigt stille ved Østhimmerlands kyst om vinteren. Bag Mulbjergenes skrænter ligger kysten og det lavvandede hav. Om vinteren ligger disen ud over Kattegat. Dis og tåge sletter horisonten. Alt går i et i grå nuancer.

Sneen har lagt sig tyndt over de frosne markveje, og rimfrosten danner et lag på al vegetation på stranden.

Ved Als Odde finder Mariager Fjord sin munding mod Kattegat. Alt er indhyllet i tæt tåge. Lydene i landskabet dæmpes ned, men vi kan alligevel høre, at der er liv derude. Havfuglene har fundet sig til rette i en mindre våge et sted ude på det snævre farvand.

Fotografierne i denne ugens foto er alle fotograferet en sen januardag i 2016.

The East Coast of Himmerland in Winter Weather

It can be very quiet along the coast of East Himmerland in winter. Behind the slopes of the Mulbjerg hills lie the coast and the shallow sea. In winter, mist settles over the Kattegat. Mist and fog erase the horizon. Everything merges into shades of grey.

A thin layer of snow has settled over the frozen country lanes, and hoarfrost forms a layer over all the vegetation on the beach.

At Als Odde, Mariager Fjord meets the Kattegat. Everything is shrouded in dense fog. The sounds in the landscape are muted, but we can still hear that there is life out there. The seabirds have settled in a small patch of open water somewhere out on the narrow stretch of water.

The photographs in this photo of the week feature were all taken on a late January day in 2016.
