

DET STILLE VAND THE TRANQUIL WATER

No. 05, February 2020

Det stille vand

Det hele starter med små dråber, der drypper af sneen højt oppe over skyerne på bjerget. Dråberne samles til små strømme af smeltevand. Hurtigt bliver det til en stor flod, der i rivende fart sender vandet ned ad de stejle skråninger på bjerget.

Længere nede er der dannet små fosser. Vandet kastes ud over klippekanten og falder flere meter ned med en buldren, der kan høres langt borte.

Men pludselig når det brusende vand et stort vandret plateau i landskabet. Plateauet består af en lavvandet sø og nogle meget store områder af mose. På den anden side af plateauet strømmer vandet ud og fortsætter sin dramatiske rejse mod havet.

Men her på plateauet er vandet blev tavs og helt klart. De rustrøde klipper på søens bund er synlige. Denne gryde fyldt med søen og det store moseområde giver under de tunge skyer en følelse af fred og ro i sindet. Det er som om man suges ind i en følelse af tidløshed i samspillet med det stille vand.

The tranquil water

It all starts with small drops dripping off the snow high above the clouds on the mountain. The drops meet into small streams of meltwater. Quickly, it turns into a large river, that rapidly sends the water down the steep slopes of the mountain.

Further down, small falls have been formed. The water is thrown over the cliff edge and falls several metres down with a thunder, which can be heard far away.

But suddenly the roaring water reaches a large horizontal plateau in the landscape. The plateau consists of a shallow lake and some very large areas of bog. Across the plateau, the water flows out and continues its dramatic journey towards the sea.

But here on the plateau, the water has become silent and quite clear. The rust-red rocks on the bottom of the lake are visible. Under the heavy clouds this hollow filled with the lake and the large bog area gives a sense of peace and quietness in the mind. It seems like you are drawn into a sense of timelessness in the interplay with the tranquil water.
